

PROGRAM DESCRIPTION

The Nursing Career Ladder Curriculum (NCLC) offers options for practical nursing (PN) and registered nursing associate degree in applied sciences (RN-AASN) education. Students are admitted into the associate degree program and are eligible to apply for licensure as a licensed practical nurse (LPN) following successful completion of the PN program requirements at the end of the first academic year. Students, who continue and successfully complete the ADN program, are eligible to apply for licensure as a registered nurse (RN). Michigan licensed practical nurses (LPNs) may apply for advanced placement into the ADN program.

The Nursing Career Ladder Curriculum (NCLC) is rigorous and challenging. It requires a high level of student commitment and mastery of content in many academic areas. Important information about the Nursing Career Ladder Curriculum:

- One-hundred-twenty (128) students are admitted in the fall semester.
- Nursing courses are offered primarily during the day/afternoon at the Livonia campus. First year courses are scheduled throughout the year as 7-week courses. The optional LPN course is available during a 4-week summer session (the LPN course is optional for RN students). To complete the RN-AASN degree, the second year courses are scheduled into four 7-week sessions.
- In addition to lecture and laboratory, clinical practice is required. Computerized testing and computer use are required in each course. Students must meet requirements as designated by the department, college, and clinical facilities. Clinical sessions are offered on day or afternoon shifts with potential weekends rotations. Courses typically include one day of lecture with two days of clinical. The clinical days may not be sequential days of the week and will vary based on clinical site availability. The PN and RN-AASN programs are approved by the Michigan Board of Nursing and have received additional national Accreditation Commission for Education in Nursing (ACEN).
