CAB 101 - Student Success
Winter 2011 Open Entry/Open Exit

This course is designed to increase students’ learning potential and success in college and beyond. Each student will actively explore learning strategies and attitudes that lead to improved grades and employability. Topics covered in the course include college language and resources, time/task planning, critical thinking, study techniques, uses of the e-portfolio, self reflection, and exploring attitudes and dispositions successful students bring to a learning environment. Each student will learn to apply the principles covered in this course to other college course work.

Topics Include:
- Determining your suitability for online, hybrid, open-entry/open exit, and on-campus instruction.
- Analyzing a course syllabus as a course contract.
- Evaluating personal barriers regarding your own student success.
- Identifying effective collaboration and group skills.
- Developing an effective learning system for academic success.
- Exploring learning and personality styles, and self reflection.
- Formulating conclusions from multiple sources of information.
- Determining appropriate information sources for academic research.
