Take your career to the next level with our project management training. We've partnered with local leaders in innovation strategy and training to offer an intensive training program that will improve your knowledge and skill in project management, and prepare you to take the Project Management Institute PMP® or CAPM® certification exam.

## training

With this training, you will be able to:

- Understand and apply the fundamental concepts of project management.
- Create a project plan based on input from stakeholders.
- Manage a project team to execute the plan and know how to deal with changes.
- Successfully manage communications with the people inside and outside the project.
- Deliver results that make a difference.

## classes

### Project Management Basics

Project managers have to be great multi-taskers and will wear many hats. Learn the basics of project management so you can successfully initiate, plan, execute, control and close a project.

### MS Project 2010: An Introduction

Learn how to use a project schedule to decompose the project deliverables into tasks, define relationships between tasks, assign resources, analyze the critical path, and explore various schedule compression techniques to reach milestone dates.

### Project Management Essentials and Exam Preparation

Gain essential knowledge about project management to deliver results for your stakeholders and prepare to succeed on the PMP® or CAPM® exam. Topics include management of integration, scope, time, cost, quality, human resources, communications, risk, and procurement. Class materials include 400+ exam questions.

### Who Can Benefit From Project Management Training?

This program is designed for the professional who:

- Has been a member of project teams for several years and now wants a position as a project team leader.
- Is a project leader who wants to improve his or her skills and gain knowledge of valuable tools.
- Has been thrust into project management and needs a fast-paced, intensive education in the discipline.
- Wants to further define and develop project management, team member, or leader skills.
- Knows that project management is the direction in which his or her career is headed.

**According to a 2007 Pricewaterhouse Coopers survey, 80% of high-performing projects use a credentialed project manager. Make sure you're one of them by earning a PMI certification.**
